

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/SG2004/000330

## A. CLASSIFICATION OF SUBJECT MATTER

Int. Cl. 7: G06T 7/60, G06F 19/00

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)  
DWPI, PCT, USPTO, internet (microarray, dna chip, gene chip, IPC: G06T, image analysis, dilation, alignment, gridding, inspection, scanner, automated, etc.)

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	P. Bajscy, <i>Gridline: Automatic Grid Alignment in DNA Microarray Scans</i> IEEE Transactions on Image Processing, 13(1), pp. 15-25, January 2004 <a href="http://alghdocs.ncsa.uiuc.edu/PB-20040101-1.pdf">http://alghdocs.ncsa.uiuc.edu/PB-20040101-1.pdf</a>	1-21
A	EP 1 450 304 A1 (CITY UNIVERSITY OF HONG KONG), 25 August 2004 the whole document	1-21
A	T. Srinark et al, <i>A Microarray Image Analysis System Based on Multiple-Snake</i> Journal of Biological Systems, 12(4), December 2004 <a href="http://vims.cis.udel.edu/publications/srinark-bioj04.pdf">http://vims.cis.udel.edu/publications/srinark-bioj04.pdf</a> (section 2 in particular)	1-21
A	C. Uehara et al, <i>Towards Automatic Analysis of DNA Microarrays</i> Proc. Sixth IEEE Workshop on Applications of Computer Vision, 2002 (section 2.2 in particular)	1-21

☒ Further documents are listed in the continuation of Box C

☒ See patent family annex

* Special categories of cited documents: "A" document defining the general state of the art which is not considered to be of particular relevance	"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"E" earlier application or patent but published on or after the international filing date	"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"O" document referring to an oral disclosure, use, exhibition or other means	"&" document member of the same patent family
"P" document published prior to the international filing date but later than the priority date claimed	

Date of the actual completion of the international search  
7 December 2004

Date of mailing of the international search report

2 FEB 2005

Name and mailing address of the ISA/AU  
AUSTRALIAN PATENT OFFICE  
PO BOX 200, WODEN ACT 2606, AUSTRALIA

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/SG2004/000330

### Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2. ☐ Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
  
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

### Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

(See supplemental box.)

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
  
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

#### Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☒ No protest accompanied the payment of additional search fees.

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/SG2004/000330

### Supplemental Box

(To be used when the space in any of Boxes I to VIII is not sufficient)

#### Continuation of Box No: III

The international application does not comply with the requirements of unity of invention because it does not relate to one invention or to a group of inventions so linked as to form a single general inventive concept. In coming to this conclusion the International Searching Authority has found that there are two inventions:

1. Claims 1-21, directed to a method for automatic inspection of a microarray slide. The use of a dilated image to calculate the orientation of the slide is considered to be a first "special technical feature."
2. Claims 22-28, directed to a system for automatic inspection of a microarray slide. Prima facie, this invention does not appear to have any "special technical features," since it includes only well-known integers and well-known combinations of computing apparatus.

Since the abovementioned groups of claims do not share any technical features, a "technical relationship" between the inventions, as defined in PCT rule 13.2 does not exist. Accordingly, the international application does not relate to one invention or to a single inventive concept.

# INTERNATIONAL SEARCH REPORT

International application No.

PCT/SG2004/000330

Information on patent family members

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.

Patent Document Cited in Search Report		Patent Family Member	
EP	1450304	NONE	
WO	0204123	AU 71822/01	EP 1307291 US 6558623
		US 2004062686	WO 2004099937
WO	2004017376		

Due to data integration issues this family listing may not include 10 digit Australian applications filed since May 2001.
